Electronic Journals

Electronic publications are becoming increasingly important to the health sciences literature. In the coming months, the Biomedical Library will focus on acquiring and cataloging electronic tools of use to our clients.

Purchase and licensing of electronic resources involves a much different process than purchase of print materials. There are many types of electronic licenses, but they can usually be categorized as one of the following:

- ◆ Shrink wrap licenses - those with the license agreement printed on the software wrapping when purchased by the user. They are not negotiable.
- ◆ Click-on licenses - agreement that only appears online when the product is first installed or accessed. The user agrees to the license terms when they click on an appropriate button.
- ◆ Standard form or boiler plate license - license that the vendor will draft and provide to the user. They are usually partially negotiable.
- ◆ Individually tailored license - negotiated between the vendor and the specific user. They are usually only applicable to very specially designed software or databases.

Some of the electronic journals to which the Biomedical Library may want to subscribe are rejected because of license restrictions. A license agreement that only allows for a single password is not realistic for a user population of several thousand. Also an agreement that defines the user population as those in a single building is rejected as it eliminates those users at USAMC, UCOM or SHAC. Licenses are reviewed to be sure they include all of the BML primary user groups. Also, any license agreements that hold the Biomedical Library responsible for monitoring or restricting use by the individual user is rejected as unreasonable.

Another consideration is the archival rights, that is, if the Biomedical Library retains ownership of the document once the subscription has ceased. Download and interlibrary loan restrictions are also reviewed. Library staff review license agreements to select those that are most beneficial for the needs of our user population.

The Biomedical Library is in the process of adding electronic titles to the online catalog. Some of these titles are in addition to the print title, and some are unique electronic titles. Currently, a "cut-and-paste" method must be used to access the electronic copy from SOUTHcat, the online catalog. Once the new web-based online catalog is available, access will be available with "point-and-click". The electronic journals may also be accessed from the Biomedical Library's homepage at <http://southmed.usouthal.edu/library/e-jour.htm> by clicking on the title of interest. If you have a title you would like to suggest, please contact Judy Burnham, 460-6888, jburnham@jaguar1.usouthal.edu.

INTERNET WORKSHOP FOR PHYSICIANS

A hands-on Internet Workshop for Physicians will be held by the Biomedical Library on August 18, 1999 5pm-10pm. The objectives of the course are:

- ◆ e-mail and discussion groups
- ◆ navigating the Internet using browsers
- ◆ using search engines to locate information on the Internet
- ◆ using bookmarks
- ◆ major medical sites on the Internet
- ◆ evaluation of webpages

The instructors for this class are Judy Burnham, Gentry Holbert and Sally Murray. Cost is \$50 which includes dinner and up to four hours Category 1 CEU. (\$10 discount for individual SOUTHMED members) For information or registration contact Judy Burnham, 460-6888.

Current Contents on CD

Published weekly, Current Contents displays the tables of contents from the world's most influential scholarly journals and provides complete bibliographic data for journal articles, reviews, editorials, corrections, and conference proceedings. In addition to complete bibliographic data, Current Contents includes author abstracts, author and publisher names and addresses, and author keywords.

Current Contents on CD/Life Sciences (located in the Reference Dept of the Biomedical Campus Site) covers over 1,370 journals and books in such areas as biochemistry, cardiovascular and hematology research, cell and developmental biology, immunology, microbiology, molecular biology and genetics, pharmacology and toxicology, and physiology.

Current Contents on CD/Clinical Medicine (available in the Medical Center Site) covers over 1,000 journals and books in such areas as anesthesia, intensive care, respiratory systems, infectious disease, psychiatry, gastroenterology, hematology, neurology, oncology, ophthalmology, orthopedics, rehabilitation, pediatrics, radiology, laboratory medicine and medical technology, rheumatology, surgery, and urology and nephrology.

The library offers a current awareness service for these two databases. Each week your topic can be run against the updated disk and the results sent to you. Contact the reference desk at either library or send a message to medlib@jaguar1.usouthal.edu for more information.

BIOFEEDBACK, New Series, Issue #44, Summer 1999

The Biomedical Library Biofeedback, a publication of the University of South Alabama Biomedical Library, is published at irregular intervals. Editor: Judy Burnham. Contributors to this issue were Judy Burnham, Geneva Bush Staggs, Mike Carmichael, Gentry Holbert, Jie Li, and Anne Romano. Comments should be addressed to Judy Burnham, Biomedical Library, University of South Alabama, Mobile, AL 36688-0002

Media Production Services News

MPS has a Dell Inspiron 7000 Notebook computer available for use with the video/data projector. The Dell Notebook features Microsoft Windows 98 along with Microsoft Office 97, including PowerPoint 97 for presentation applications. A MacOperator has been installed for those wishing to present PowerPoint presentations created on a Mac. The Dell Notebook is equipped with 128 MB SDRAM, 4GB hard drive, 24x internal CD-ROM, and floppy drive, with external zip drive and a ATI 8MG video card for 32 bit true color projection. To schedule use of the Dell Notebook contact Media Production Services, 460-6317.

A Cannon Digital Video Camcorder is also available from MPS. The DV formatted professional camcorder features CD pick-up, a 16x zoom lens and optical image stabilization. The video acquired with this camcorder will be superior to the analog formats used in the past.

The charges for video recording and post production have been *reduced* from \$65.00 per hour to \$50.00 per hour. The costs for Dye-sublimation printing have been restructured to be less confusing:

◆ 5"x7" or smaller	\$3.00 each
◆ 8"x10"	\$6.00 each

There is now a minimum charge of \$6.00 for all service requests.

Lippincott Titles Available on Web

Back issues of full-text nursing journal articles and current issue abstracts are available online at Lippincott's NursingCenter at <http://www.nursingcenter.com/journals>. The fully searchable articles are available from January 1996 to present and include the American Journal of Nursing, MCN: The American Journal of Maternal/Child Nursing, Nursing Research, Journal of Nursing Administration, Nurse Educator, and Computers in Nursing.

HOURS for BIOMEDICAL LIBRARY

(Summer)

Campus site	
Monday-Thursday	7:15am - 10:00pm
Friday	7:15am - 5:00pm
Saturday	9:00am - 5:00pm
Sunday	1:00pm - 8:30pm

Medical Center Site (1st floor Mastin Building)

Monday-Thursday	8:00am - 6:00pm
Friday	8:00am - 5:00pm
Saturday	9:00am - 5:00pm
Sunday	Not staffed

Both sites will be closed July 4-5 and September 6. Check with Circulation or Reference staff for additional holiday hours.

Faculty and Staff News

At the recent meeting of the Medical Library Association (MLA), Jie Li presented "Enhancing Global Information Access to Infection Diseases". She also completed her service as Chair of the Murray Gottlieb Prize Jury. Next year she will serve as a jury member of MLA Ida and George Eliot Prize Jury.

At MLA, Judy Burnham completed her year as Chair of the Nursing and Allied Health Resource Section (NAHRS). Also at this meeting, Judy, along with other colleagues from the NAHRS received the Ida and George Eliot Prize. This award is presented annually for a work published in the preceding calendar year that has been judged most effective in furthering medical librarianship.

In June, Judy Burnham presented "Getting the Needed Information With Ease: Locating Articles, Books and Internet Sites to Support Evidence Based Practice" at the American

Physical Therapy Association meeting in Washington, DC. Her co-presenter was Dr. Dennis Fell, Assoc. Professor, USA Department of Physical Therapy.

"The Internet: A Tool in Clinical Practice" was presented by Judy Burnham at the USA COM Alumni Association meeting in June.

Tom Williams has assumed the position of Secretary/Treasurer of the International Cooperation Section of MLA. Jie Li is editor of the newsletter for this section.

Tom Williams has recently completed his term as President of the University Lion's Club. Judy Burnham is beginning as treasurer of that group.

Gentry Holbert, Education Coordinator, has been named to the Editorial Board of the Journal of Southern Academic and Special Librarianship, an independent, professional, refereed electronic journal.

Gentry Holbert will demonstrate the Alabama Virtual Library June 18th at the Alabama Educational Technology Conference in Birmingham.

Joel Woods has joined the Circulation Department at the Campus Site as Library Technical Assistant I.

Anne Romano, Supervisor of Technical Services, will be leaving the Biomedical Library this summer to pursue her graduate degree in library science.

Diane Williams will be transferred from Systems to Head of Technical Services.

Mercedes Tyus-Braford, Supervisor of Interlibrary Loan will be retiring this summer after 20 years of service.

Ellen Sayed will be joining the BML faculty in August as Information Services Librarian. Ellen will be assigned to reference and interlibrary loan.

Carol Wright as been promoted to Library Supervisor, Medical Center Site.

Library Services Fees (March 1999)

(Fees subject to change)

Early Black American leaders in nursing/AT Davis. Jones and Bartlett, 1999
*WZ 112.5 D261e 1999

Classes Offered

During July and September, the Biomedical Library Campus Site is offering the following classes to University faculty, staff, students, and SOUTHMED members: OVID CINAHL & MEDLINE, Internet PubMed & Internet Grateful Med, Current Contents, Internet Basics, Searching & Evaluating Internet Resources, and Managing Internet Bookmarks.

These classes and classes on other requested topics will be done on a per-request basis anytime the library is open. Please schedule your learning session by contacting the reference staff at 460-7044 or medlib@jaguar1.usouthal.edu. More detailed class information is listed on the Biomedical Library's Web page.

Gentry Holbert, Education Coordinator, has been busy organizing a number of training sessions for various groups, including the High School Science Education and Research Program, research classes in the COAHP and the CON, BEAR students and Internal Medicine residents. To schedule instruction for your class, please contact Gentry Holbert at 460-7045, gholbert@jaguar1.usouthal.edu.

LOCATORplus

On April 12, the National Library of Medicine unveiled its new web catalog, called LOCATORplus, which will allow anyone with Internet access to find out what books, journals, audiovisuals, manuscripts, and other items are contained in the world's largest medical library.

Many exciting new features will be available via LOCATORplus. Customers using the catalog from the Web can search by author, MeSH term, title, conference name, keyword and many other specific fields, and can then e-mail the results to themselves. Current receipts of both serial and monograph materials will be displayed along with information about material which is on order or available electronically. Hotlinks to online journals will be available from many records. Direct access to a variety of other resources will be available from LOCATORplus including MEDLINE, MEDLINEplus, Images of the History of Medicine, TOXNET, HSTAT, and other U.S. medical catalogs.

LOCATORplus can be found at: <http://www.nlm.nih.gov/locatorplus>.

A Quick Start Tutorial can be found at: <http://www.nlm.nih.gov/locatorplus/tutorials/quickstart/sld001.htm>.

MEDLINEplus

MEDLINEplus is the National

Library of Medicine's web site for consumer health information available on the World Wide Web from the NLM Home Page (<http://www.nlm.nih.gov/>) or directly at MEDLINEplus (<http://www.nlm.nih.gov/medlineplus>). MEDLINEplus contains information on:

Health topics - links for common diseases and conditions including arthritis, diabetes, fibromyalgia, and dozens of others.

Each topic page includes links to MEDLINE® searches for locating journal articles.

Dictionaries - for finding definitions of medical terms.

Databases - for articles and information from other organizations.

Organizations - links to major national groups providing information to consumers.

Clearinghouses - links to organizations that will send health literature to your home.

Publications/News - textbooks, newsletters, and health news sources for reading on-line.

Directories - for finding health care professionals and facilities.

Libraries - to find a nearby library for health consumers.

MEDLINEplus is not meant to be an exhaustive list of every health web resource. It is a selective list of appropriate, authoritative health information sources.

*Judy Burnham,
along with co-
recipient,
Barbara
Schloman, Kent
State, receives
the Ida and
George Eliot
Prize at the
recent Medical
Library
Association
meeting.*

Faculty Publications

Listed below are journal publications by USA faculty indexed in MEDLINE, CINAHL, HEALTHstar and Current Contents for June-August 1999. This list is generated from the address of the first listed author in MEDLINE, CINAHL and HEALTHstar, and from the institution in Current Contents. Department chairs are asked to submit citations of recent publications by their department members. If we missed your latest contribution to the literature, please notify the Editor so it can be included in a future listing. New faculty are encouraged to submit their latest publications to the Editor.

Journals@OVID

Journals@OVID has been added to the online tools available to the Biomedical Library clients. Journals@OVID is a single database that contains more than 320 key sci-tech-med journal titles for the last six years. Previously the Biomedical Library had access to 80 full-text titles via the OVID system. Links will be provided to these journals. You can now search all full-text titles at once rather than searching each subset individually. For further information contact the Reference Desk at either site of the Biomedical Library

Visitors from the Ukraine

The Biomedical Library recently had the pleasure of working with Serhiy Lapchenko, an international visiting librarian from the Volyn Regional Scientific Medical Library in the Ukraine. Serhiy accompanied a team of Ukrainian physicians who are visiting on behalf of Dr. Wladimir Wertelecki's grant to support the Ukrainian-American Birth Defects Program.

Serhiy spent more than 20 hours of observation and training time in individual departments the Biomedical Library, both Campus and Medical Center Sites, and the University Library. He received training in the use of National Library of Medicine databases, PubMed and Internet Grateful Med, Web genetics sites, and computer programs such as Ariel, PowerPoint, PageMaker, and WordPerfect. Utilizing his new knowledge, Serhiy began creating a teaching program for physicians and librarians back in his home town of Lutsk, which is situated in the northwestern part of Ukraine in the Volyn Region.

The visiting Ukrainian team has created 21 fact sheets for Ukrainian physicians concerning diagnosis aspects of the most common birth defects as well as created a Web site. The demo Web site is available at <http://www.usouthal.edu/genetics/ukrmain.htm>.

Serhiy was excited to learn that Biomedical Libraries Director, Tom Williams, is facilitating the donation of USA Biomedical Library books, slides, and other materials necessary for their work in the Ukraine.

Serhiy plans to stay in touch with the Department of Medical Genetics and the Biomedical Library, for he feels that such assistance "will make an invaluable contribution to our Birth Defects Program."

DONATIONS

The Biomedical Library wishes to thank the following individuals who have contributed materials.

Dr. Ron Allison

Dr. Yogendra Bhatnagar

College of Nursing - Maternal-
Child Nursing Department

Dr. Norma Doolittle

Nancy Erwin

Scott Fisher

Sharon Gilbert

Carolyn Gunn

Dr. Aubrey Taylor

Marilyn Wilhite

SOUTHmed Update

“Good information is the best medicine”, states well know heart specialist Michael E. DeBakey, M.D. He further stated that “immediate access to current medical research information is as critical as the biopsy and the x-ray have been in the diagnosis and treatment of disease. Not only health professionals, but also consumers should have the most recent medical information at their fingertips.”

Membership in SOUTHmed can provide access to current, timely medical information for health care professionals in the hospital setting or in private practice. Classes in accessing medical information via the Internet or searching MEDLINE are another benefit of membership. Membership also meets the knowledge based information requirements for Standard IX of the JCAHO Standards.

The Biomedical Library exhibited at the Alabama Hospital Association Annual Meeting in Birmingham in June. During the exhibit, demonstrations were available on Internet Grateful Med and PubMed as well as Internet resources dealing with health care administration. Information on the SOUTHmed Information System was also made available at the exhibit.
