MD Consult

The Biomedical Library has a trial subscription to MD Consult for Sept-Dec. MD Consult provides answers to clinical questions and helps clinicians keep up-to-date. MDConsult contains the following resources:

Medical Texts: More than 35 standard medical texts, with images, are included. Individual texts can be searched, or all can be searched at once. The Table of Contents and Index of each text can also be reviewed.

Full-text Journal Articles: Full-text of over 45 medical journals and the Clinics of North America are included. MEDLINE, AIDSLINE, HealthStar and CANCERLIT can be searched with links to full-text. Journal articles are added daily.

Drug Information: Current prescribing information on over 30,000 medications is available using Mosby's GenRx. Search by brand or generic name, class or indication. Also included are USP off-label uses and cost of therapy data. New drug updates are available for recent developments. Drug information is updated quarterly.

Practice Guidelines: Over 600 peer-reviewed practice guidelines are available from 50 medical societies and government agencies. Guidelines can be searched by subject, speciality, topic, or authoring organization. New guidelines are added as available.

Patient Handouts: More than 6,000 topics are covered in the group of patient handouts. Handouts can be customized with special instructions and

physician contact information. Spanish translations are available for key subjects. This section is updated annually with twice annual updates for medication materials.

What Your Patients are Reading: MD Consult canvasses the popular press each week and compiles full-text clinical information on each topic. Scanned are news and personal interest magazines, major newspapers, television and entertainment programming.

In This Week's Journals: The contents of the big five weekly medical journals are presented in an easy-to-scan format with article summaries or link to more in-depth related information. This section is updated weekly.

Clinical Topic Tours: Each tour includes a brief overview and an extensive catalog of online information resources on the subject. A new topic is added each week.

CME Center: Over 300 Category 1 CME modules are available. The collection covers 11 specialities. Each module includes an online test with immediate feedback and online CME credit certificates.

Today in Medicine: Each weekday MD Consult summarizes important information from over 100 medical journals, announcements and medical conferences. Results can be personalized to interest areas. Results are organized by speciality. Today in Medicine remembers the individual's last visit and presents only the new stories since that date. Each story links to other related literature, texts, drug information and Web sites. Today in Medicine is updated hourly 8am-noon and every other hour noon-5pm, Monday through Friday.

MD Consult allows searching within any specific service area or throughout all the sections. A list of full-text books and journals can be found on page 3 of this issue. An Introductory Guide is available from the Biomedical Library. Call 460-7044 or 471-7855 to request a copy. Each user must sign up with a personal password.

To reach MD Consult go to <http://southmed.usouthal.edu/library/mdconsult.htm>. MD Consult can be used from any USA campus computer.

Internet Workshop for Physicians

A hands-on Internet Workshop for Physicians will be held by the Biomedical Library on November 10, 1999 5pm-10pm. The objectives of the course are:

- e-mail and discussion groups
- navigating the Internet using browsers
- using search engines to locate information on the Internet
- using bookmarks
- major medical sites on the Internet
- evaluation of webpages

The instructors for this class are Judy Burnham, Gentry Holbert and Sally Murray. Cost is \$50 which includes dinner and up to four hours Category 1 CEU. (\$10 discount for individual SOUTHMED members) For information or registration contact Judy Burnham, 460-6888.

Gift Subscriptions

Interpretation of current copyright law prevents the Biomedical Library from accepting gift subscriptions that are purchased at individual rates. The library can only accept back issues of titles for which the library has an institutional subscription. However, gift subscriptions can be accepted if purchased at the institutional rate. If you have questions concerning this policy, please contact Judy Burnham, 460-6888, jburnham@jaguar1.usouthal.edu.

BIOFEEDBACK, New Series, Issue #45, Fall 1999

The Biomedical Library Biofeedback, a publication of the University of South Alabama Biomedical Library, is published at irregular intervals. Editor: Judy Burnham. Contributors to this issue were Judy Burnham, Geneva Bush Staggs, Mike Carmichael, Gentry Holbert, Jie Li, Sally Murray and Diane Williams. Comments should be addressed to Judy Burnham, Biomedical Library, University of South Alabama, Mobile, AL 36688-0002

National Medical Librarians Month

October is National Medical Librarians Month! Show your support by utilizing some of the library's many services:

- SIGN-UP for a class for yourself or schedule a session to complement your class. See the Web page for details.
- ASK a question at the reference desk in person, on the phone (460-7044 campus, 471-7855 UMC), or through e-mail (medlib@jaguar1.usouthal.edu).
- ORDER an article or book through Interlibrary Loan from the Web page.
- SUGGEST something for the collection through your department's library liaison.
- VISIT the library to learn about the latest services & privileges.
- TAKE a librarian to lunch and discuss your areas of research & information needs.

Faculty Staff News

At the recent meeting of the Alabama Health Libraries Association, Jie Li completed her year as President.

Marian Lee has joined the staff at the Medical Center site. She previously worked at the USA Ob/Gyn Clinic.

Harrison's Online Offers Board Prep

In addition to the full-text of Harrison's Principles of Internal Medicine, Harrison's Online also offers 823 multiple-choice questions accompanied by answers, detailed explanations and chapter references. These questions are perfect for board prep or as a clinical refresher. To access the Harrison's Online PreTests go to <http://www.harrisonsonline.com> and choose "Pre-Test Questions".

Homepage Update

The Biomedical Library Homepage has a new look and some new information. Check it out at <http://southmed.usouthal.edu/library/>

One new section, Medical Specialties, is being developed in concert with the new library liaison program. Each department in the Colleges of Medicine, Nursing, and Allied Health Professions, will have a representative page that will link to the department's page (if they have one), and to other sites of interest. The page will include: links to associations and organizations that might be of interest; electronic publications; major lists; and selected individual sites. Departments may request specific links to be added to these pages by contacting their library liaison, or email the sites to the webmaster at medlib@jaguar1.usouthal.edu. If you have any questions about the Library Liaison program, contact your liaison or Judy Burnham at jburnham@jaguar1.usouthal.edu.

Wearing Denim to the Office Could be the Most Productive Thing You've Done All Year

When you wear denim to the office on Friday, Oct. 8, you'll be helping find a cure for breast cancer. All you need to do is donate \$5 for breast cancer research at the Biomedical Libraries and wear denim to work that day. It's that easy to help eradicate the disease that takes a woman's life every 12 minutes. Nothing could be more productive.

The Biomedical Libraries will participate in Breast Cancer Awareness Week Oct. 4th thru Oct. 8th with special displays and activities such as Lee National Denim Day on Friday, October 8th. Sign-up sheets will be available in the libraries to donate \$5 for breast cancer research and wear denim that Friday. Biomedical Libraries staff will also show their support by wearing pink ribbons that week.

Library Services Fees (March 1999) (Fees subject to change)

* Eligible patrons not charged for inhouse

Microcomputer / Multi-Media Lab Update

Roberta Barclay has moved to the Systems Department from the College of Medicine Microcomputer and Multimedia labs. She will be helping keep all computers in the Biomedical Library sites running well. Sally Murray is now managing the College of Medicine Microcomputer Lab and the Multimedia Lab.

If you have any questions about the lab, please contact her at 414-8210 or smurray@jaguar1.usouthal.edu.

The College of Medicine Microcomputer Lab now has Win98 and Microsoft Word. With Win98, the sign-on looks different, but the username and password are the same as for the old setup. There is an FAQ area on the wall answering the most Frequently Asked Questions in the lab - including how to sign on. The Biomedical Library has ordered new computers for the College of Medicine Microcomputer Lab. When they come in, Microsoft Office 2000 with PowerPoint, Word, and Excel will be added.

There is a new multimedia program that may be used in the Multimedia Lab - *Interactive Pathology Laboratory* from UAB. Some of the Multimedia Lab computers have been out of order recently from users adding and deleting programs. Ask library staff if you need help. Please do not change anything on the library computers.

TOXNET

Philip Wexler, of the Toxicology and Environmental Health Information Program spoke at a recent meeting of the Alabama Health Libraries Associa-

tion. Wexler noted that the TOXNET system, with its new Web interface, offers an easy-to-use, consolidated set of files, including peer-reviewed data and support references, in toxicology and related fields. Several of its files would be of special interest to practicing physicians. Among these is the Hazardous Substances Data Bank which includes information on antidote and emergency medical treatment, human toxicity, pharmacology and pharmacokinetics, clinical laboratory methods, and environmental and occupational exposures. The TOXLINE file of some 3 million bibliographic references is an ideal source for keeping up with current literature in the physician's area of interest. With TOXNET, rural health practitioners have a way to dramatically shrink their distance and time to a major information resource that may help in the care of patients suffering from chemical exposures, in the home, workplace, or ambient environment.

You can reach TOXNET at <http://toxnet.nlm.nih.gov/servlets/simple-search>

Newspaper Vertical File

The Biomedical Library's Newspaper Vertical File is now available from the Web page. It's a select collection of full-text Mobile Register articles about persons, events, or activities related to the USA Colleges of Medicine, Nursing, or Allied Health, and its hospitals or libraries.

Go to the Biomedical Library home page, then click on Resources, and scroll down to the Newspaper Vertical File. This searchable collection of online articles goes back to 1992 and is being updated constantly. It takes about 3 months for new articles to appear. Take a look, search for your name, and send Gentry Holbert your comments, 460-7045, gholbert@jaguar1.usouthal.edu

Classes Offered

The following classes will be offered by the Biomedical Library August - December 1999. All classes will be held at the Biomedical Library Campus site.

Advantage Internet: Searching & Evaluating

Lost on the Internet? Can't seem to find what you need? Can't tell if the site you've found is trustworthy? This class helps answer those questions. It covers utilizing Internet search engines to find information as well as evaluating Web sites for accuracy, authority, currency, content, and organization. Participants should have a basic knowledge of the Internet with some usage.

Internet Basics

This class is designed to give basic knowledge of utilizing the Internet for medical research. It includes browser navigation, printing & saving, searching, and subject-oriented sites.

OID CINAHL*

Learn to effectively search and retrieve articles using OVID CINAHL as well as techniques to print and save results. *Participants must have an OVID account and password.

OID MEDLINE*

Learn to effectively search and retrieve articles using OVID MEDLINE as well as techniques to print and save results.

*Participants must have an OVID account and password.

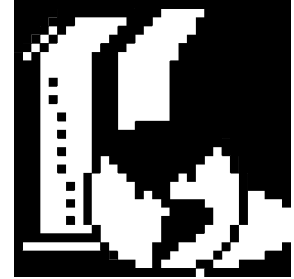

PubMed/IGM

Learn how to search and navigate Medline through the free databases of the National Library of Medicine, PubMed and Internet Grateful Med (IGM). Learn how to limit results, focus searches, and retrieve articles in print and online.

Workshops for Research Assistants & Secretaries

Learn about the Biomedical Library's resources and services, including remote access, library catalog searching tips for books & journals, article retrieval, and

fact finding. Information includes both print and online resources. Participants will learn to locate information for incomplete citations, such as when only the first page and page and name of the journal is known.

Full Calendar Class Schedule

September	7 (T)	OVID MEDLINE, 8 - 9 AM
	15 (W)	PubMed/IGM, 9 - 10 AM
	17 (F)	OVID CINAHL, 3 - 4 PM
	20 (M)	Advantage Internet, 9 - 10 AM
	23 (Th)	OVID MEDLINE, 12 - 1 PM
	27 (M)	Workshop for Research Assistants & Secretaries, 8 - 9 AM

	25 (M)	Workshop for Research Assistants & Secretaries, 8 - 9 AM
November	26 (T)	Internet Basics, 6 - 7 PM
	8 (M)	Advantage Internet, 9 - 10 AM
	9 (T)	OVID MEDLINE, 8 - 9 AM
	15 (M)	Workshop for Research Assistants & Secretaries, 8 - 9 AM
	17 (W)	PubMed/IGM, 9 - 10 AM
	18 (Th)	OVID MEDLINE, 12 - 1 PM
December	19 (F)	OVID CINAHL, 3 - 4 PM
	30 (T)	Internet Basics, 6 - 7 PM
	6 (M)	Advantage Internet, 9 - 10 AM
	7 (T)	Internet Basics, 6 - 7 PM
	13 (M)	Workshop for Research Assistants & Secretaries, 8 - 9 AM
	15 (W)	PubMed/IGM, 9 - 10 AM
17 (F)	OVID CINAHL, 3 - 4 PM	
20 (M)	OVID MEDLINE, 11 - 12 PM	

Media Production Services Update

USA Publication Services has acquired a new large format color printer for printing posters up to 54 inches wide by any reasonable length. The charges are substantially less than MPS has been paying outside vendors. MPS has teamed up with Publications to provide even more savings. Several posters have been produced this way so far with quality results.

OVID AutoAlert

OVID's AutoAlert service allows you to save your searches on OVID and it will send you the search results to you by email every time OVID is updated. OVID updates its databases once a week. Follow the following steps to save an AutoAlert.

1. Do your search on OVID*.
2. Click "Save Search History."
3. Click "as an AutoAlert (SDI)."
4. Under General Parameters, type a search name.
5. Type in your email address in the box of Recipient's Email Address.
6. Type in your Email subject.
7. Check the Output Format you want to receive under Fields.
8. Check the Citation Format. (If you use Reference Manager or EndNote to manage your references, check "Reprint/Medlars.")

*If you want to view the table of contents of particular journals, you may do a search for only the journal title(s).

Liaison Program

Librarians from the Biomedical Library have been designated as liaisons to departments in the Colleges of Medicine, Nursing and Allied Health Professionals.

The purpose of the liaison program is to communicate with the faculty concerning library services and collection. The Biomedical Library also solicits suggestions from the faculty for new books and journals. Another aspect of assistance from the faculty is in the development of "Speciality Pages" on the BML web page. These "Speciality Pages" cover associations/organizations, full-text, lists, and links in each discipline. Faculty are asked to submit URLs for these "Speciality Pages".

Liaisons are in the process of visiting departments to explain the program and to solicit input from the faculty. If your department has not yet scheduled an initial presentation from the liaison for the department, please call the appropriate individual above.

Using EndNote to Manage Your References

Are you still spending hours typing bibliographies, or using index cards to organize their references? Do it the easy way--by using EndNote. Use EndNote for Windows and Macintosh to manage your bibliographies.

By using EndNote, you can search bibliographic databases such as Ovid databases, PubMed or Internet Grateful Med directly from EndNote. You may also import your search result to EndNote databases from OVID or other databases. You can also create an unlimited number of databases of your own and organize references in a database.

Most important, EndNote creates bibliographies automatically in your word processor. You can create 1-step bibliographies in Microsoft Word and WordPerfect. Using EndNote, you can insert citations and format bibliographies from within Word and WordPerfect. EndNote creates bibliographies in a variety of word processors: Microsoft Word, WordPerfect, AmiPro, AppleWorks (Mac), FrameMaker (Mac), WriteNow, Nisus, MacWrite, RTF, and HTML. EndNote comes with more than 300 bibliographic styles for a variety of journals. Each style can be modified, or you can create new styles.

Please contact Jie Li, 471-7855 or jli@jaguar1.usouthal.edu to attend an EndNote workshop or arrange an EndNote workshop for your department.

DONATIONS

The Biomedical Library wishes to thank the following individuals who have contributed materials.

David Martin
Dr. Charles Rodning

Faculty Publications

Listed below are journal publications by USA faculty indexed in MEDLINE, CINAHL, HEALTHstar and Current Contents for August-October 1999. This list is generated from the address of the first listed author in MEDLINE, CINAHL and HEALTHstar, and from the institution in Current Contents. Department chairs are asked to submit citations of recent publications by their department members. If we missed your latest contribution to the literature, please notify the Editor so it can be included in a future listing. New faculty are encouraged to submit their latest publications to the Editor.

- Alexeyev MF. Winkler HH. Gene synthesis, bacterial expression and purification of the *Rickettsia prowazekii* ATP/ADP translocase. *Biochimica et Biophysica Acta - Biomembranes*. 1419(2):299-306, 1999 Jul 15.
- Alexeyev MF. The pKNOCK series of broad-host-range mobilizable suicide vectors for gene knockout and targeted DNA insertion into the chromosome of gram-negative bacteria. *Biotechniques*. 26(5):824-6, 828, 1999 May.
- Babal P. Pindak FF. Russell LC. Gardner WA Jr. Sialic acid-specific lectin from *Trichomonas foetus*. *Biochimica et Biophysica Acta*. 1428(1):106-16, 1999 Jun 28.
- Baines CP. Cohen MV. Downey JM. Signal transduction in ischemic preconditioning: the role of kinases and mitochondrial K(ATP) channels. [Review] *Journal of Cardiovascular Electrophysiology*. 10(5):741-54, 1999 May.
- Baines CP. Wang L. Cohen MV. Downey JM. Myocardial protection by insulin is dependent on phosphatidylinositol 3-kinase but not protein kinase C or K-ATP channels in the isolated rabbit heart. *Basic Research in Cardiology*. 94(3):188-198, 1999 Jun.
- Baldisseri DM. Rustandi RR. Zhang ZS. Tang C. Bair CL. Landar A. Zimmer DB. Weber DJ. Letter to the Editor: H-1, C-13 and N-15 NMR sequence-specific resonance assignments for rat apo-S100A1(alpha alpha). *Journal of Biomolecular NMR*. 14(1):91-92, 1999 May.
- Barkley TW Jr. Rhodes RS. Dufour CA. Predictors of success on the NCLEX-RN. Among baccalaureate nursing students. *Nursing & Health Care Perspectives*. 19(3):132-7, 1998 May-Jun.
